

Fun With Math

Complete by finding the value of each symbol

$$\text{House} + \text{Store} = 19$$

$$\text{Castle} + \text{Store} = 9$$

$$\text{Castle} + \text{Castle} = 0$$

$$18 + \text{Store} = ?$$

$$\text{House} = \underline{\hspace{2cm}}$$

$$\text{Store} = \underline{\hspace{2cm}}$$

$$\text{Castle} = \underline{\hspace{2cm}}$$

$$\text{Game Controller} + \text{Car} = 7$$

$$\text{Rocket} + \text{Rocket} = \text{Game Controller}$$

$$\text{Rocket} + \text{Game Controller} = ?$$

$$18 + \text{Car} = 19$$

$$\text{Game Controller} = \underline{\hspace{2cm}}$$

$$\text{Rocket} = \underline{\hspace{2cm}}$$

$$\text{Car} = \underline{\hspace{2cm}}$$

Answer Key

Complete by finding the value of each symbol

$$\begin{array}{l} \text{House} \text{ (10)} + \text{Store} \text{ (9)} = 19 \\ \text{Store} \text{ (9)} + \text{Store} \text{ (9)} = 9 \\ \text{Store} \text{ (9)} + \text{Store} \text{ (9)} = 0 \\ 18 + \text{Store} \text{ (9)} = 27 \end{array}$$

$$\text{House} = 10$$

$$\text{Store} = 9$$

$$\text{Store} = 0$$

$$\begin{array}{l} \text{Game Controller} \text{ (6)} + \text{Car} \text{ (1)} = 7 \\ \text{Rocket} \text{ (3)} + \text{Rocket} \text{ (3)} = \text{Game Controller} \text{ (6)} \\ \text{Rocket} \text{ (3)} + \text{Game Controller} \text{ (6)} = 9 \\ 18 + \text{Car} \text{ (1)} = 19 \end{array}$$

$$\text{Game Controller} = 6$$

$$\text{Rocket} = 3$$

$$\text{Car} = 1$$
